# Which is the Right Path?

# Forex Trading is a **Trillion \$ Dollar** industry

You can make your career  
very easily from here.

# What is Forex?

When you Exchange your Currency to Buy any other Currency, Such as Dollor, Euro, Pounds.

**That Is Called Forex Exchange.**

**NOTE-** If we are dealing in currency pairs & taking EURUSD pair for trading. If we are going for EURUSD buy then We are Buying EURO & Selling US Dollar If we are going for EURUSD sell then We are Selling EURO&Buying US Dollar

# What is Forex Trading?

Forex trading, also known as foreign exchange trading or FX trading, is the act of buying and selling currencies in the global foreign exchange market with the goal of making a profit. It is the largest and most liquid financial market in the world, with an estimated daily trading volume exceeding \$6 trillion. Forex trading occurs 24 hours a day, five days a week, and involves the exchange of one currency for another. Traders aim to profit from fluctuations in currency prices by buying a currency at a lower price and selling it at a higher price or vice versa.

## How Forex Trading Works

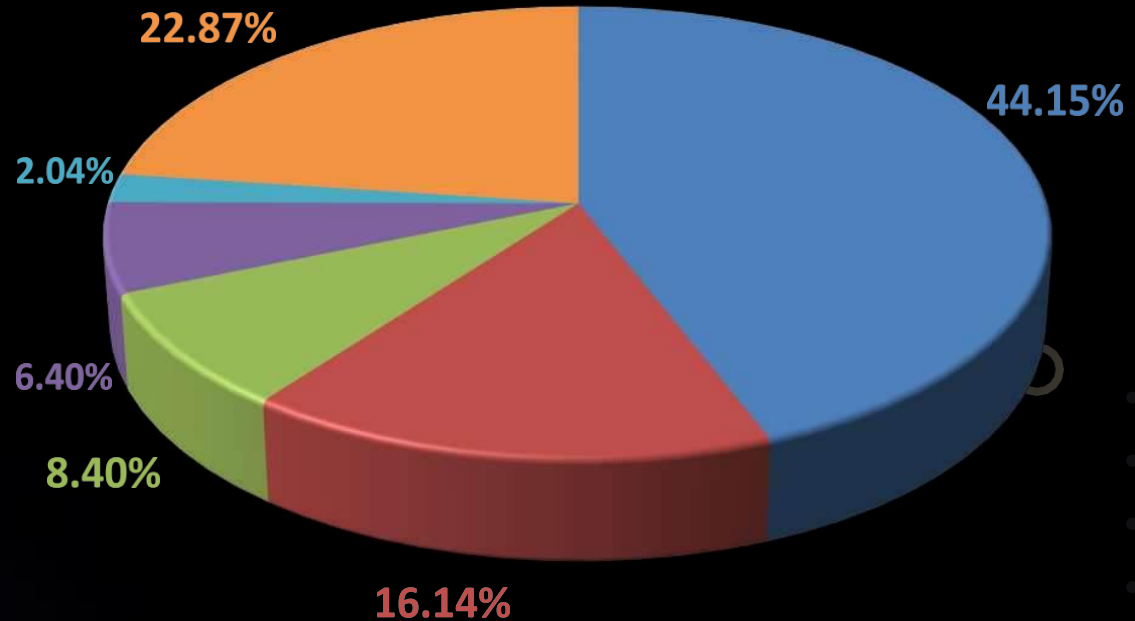

In Forex trading, currencies are always quoted in pairs, such as EUR/USD (Euro/US Dollar), GBP/JPY (British Pound/Japanese Yen), or USD/JPY (US Dollar/Japanese Yen). Each currency pair consists of two currencies: the **base currency** (the first currency in the pair) and the **quote currency** (the second currency). The price of the pair indicates how much of the quote currency is needed to buy one unit of the base currency. For example, if EUR/USD is quoted at 1.10, it means 1 Euro (EUR) is equivalent to 1.10 US Dollars (USD).

# What is Cryptocurrency?

A cryptocurrency is a digital currency, which is an alternative form of payment created using encryption algorithms. The use of encryption technologies means that cryptocurrencies function both as a currency and as a virtual accounting system. To use cryptocurrencies, you need a cryptocurrency wallet.

Crypto is a digital currency designed to work as a medium of exchange through a computer network that is not reliant on any central authority, such as a government or bank, to uphold or maintain it.

# What is Cryptocurrency Trading?

Cryptocurrency trading is the process of buying and selling digital currencies on platforms known as exchanges, where traders aim to profit from price fluctuations. Cryptocurrencies are decentralized digital assets that use cryptography for secure transactions. They operate on blockchain technology, which ensures transparency and immutability. Well-known cryptocurrencies include Bitcoin (BTC), Ethereum (ETH), and Ripple (XRP).

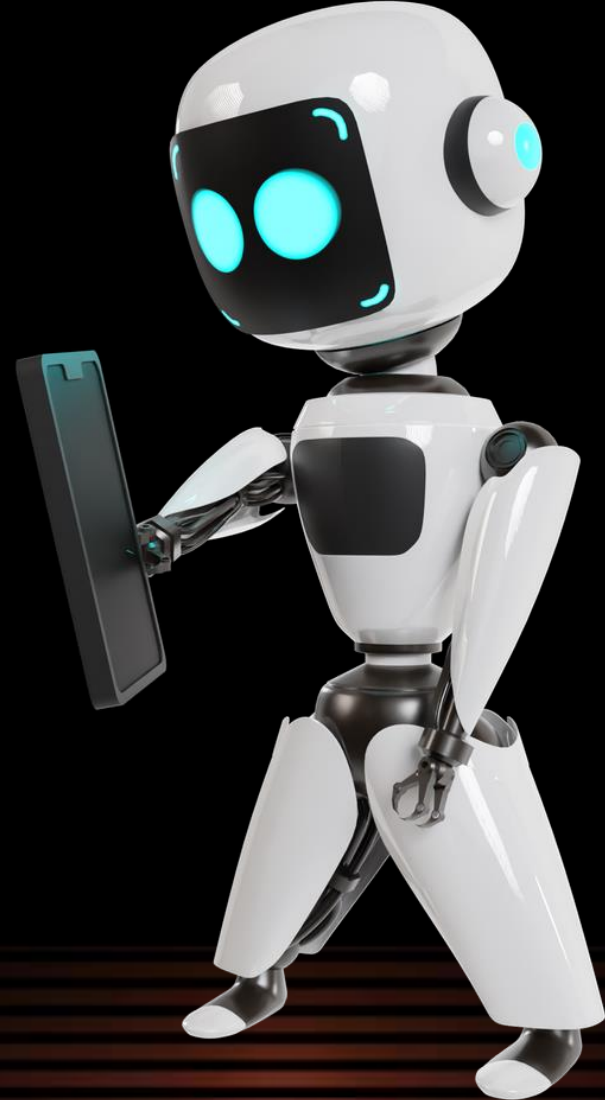

Trading cryptocurrencies is similar to trading stocks or commodities, but it involves digital assets that exist only online. The primary goal of cryptocurrency trading is to buy low and sell high or to short sell when expecting the price to fall. This type of trading has gained immense popularity due to the potential for high returns, but it is also highly speculative and carries significant risks.
